

QUICKGUIDE: LOW/FORMAT UTILITY OF MX-FX PENDRIVE

MX Technology has released version 3.15.0.0 for the MX-FX Series Flash Drive on 7/23.

WARNING: MX Technology recommends always backing up data before starting pendrive format!

EASY STEPS TO FORMAT MX-Technology MX-FX series pendrive:

1. Download format utility: MX_FX_FORMAT_Tool_3.15.0.0
2. Unzip MX_FX_FORMAT_Tool_3.15.0.0.rar and right click on
3. Double click on the Restore v3.15.0.0 icon and launch the utility

Format: This process will format the selected drive/partition with specific file system (FAT32/NTFS)

Restore: This process will try to “Low Level Format” the device and restore back to factory default values

4. Format:

Plug in the MX-FX pendrive, the utility will auto detect the MX-FX pendrive and select file system FAT32 or NTFS then click “format” the message box will show “OK” when the format completed

5. Restore:

Plug in the MX-FX pendrive, the utility will auto detect the MX-FX pendrive and click "Restore" button, Click "Yes" start low level format MX-FX pendrive

Restoring Device... , the message box will show "Restore completed" when the process completed
